

# Dairy farm

## Project description:

Milk production – is the main type of activity.

The planned number of the dairy herd is 50 heads.

The farm will operate on the regional market for dairy products, according to economic calculations.

## Advantages:

- ✓ High-quality dairy raw materials provision to local residents.
- ✓ Ability to create a premium product at the low net cost.
- ✓ High demand for the dairy products in the Region.

## Place of project implementation:

Dnipropetrovs'k Region,  
Tsarychanskyy district, village-  
Lyashkivka

# Dairy farm

## Project analysis:

- Milk and dairy products are in high demand in Ukraine, that is why we can conclude that this is a competitive project.
- The dairy farm will always be able to provide the Region with fresh and high-quality milk.
- The planned farm will not be very large, so it will be paid off in the short time.

## Economic Indicators:

Project value: : 58 600 €

NPV: 141 396 €

IRR: 36 %

Payback period : 2,8 years
